PRODUCT SERIES GUIDE

LITE, PRO, MAX, and ULTRA represent different classes of the same type equipment, designed for various use cases – ranging from rental applications with different intensity levels to

permanent installations at venues of different sizes and performance requirements, and other distinctions, depending on the product group, which we are talking about.

LIGHTING

Lighting equipment is a key element of any stage performance. From a theatre play to grand concert it helps to create the unique scenography, to bring dramatic atmosphere or dynamic visual impact for spectacular show. At the same time, many public spaces, museums, and venues require specialized lighting solutions, accent lighting, and zoning.

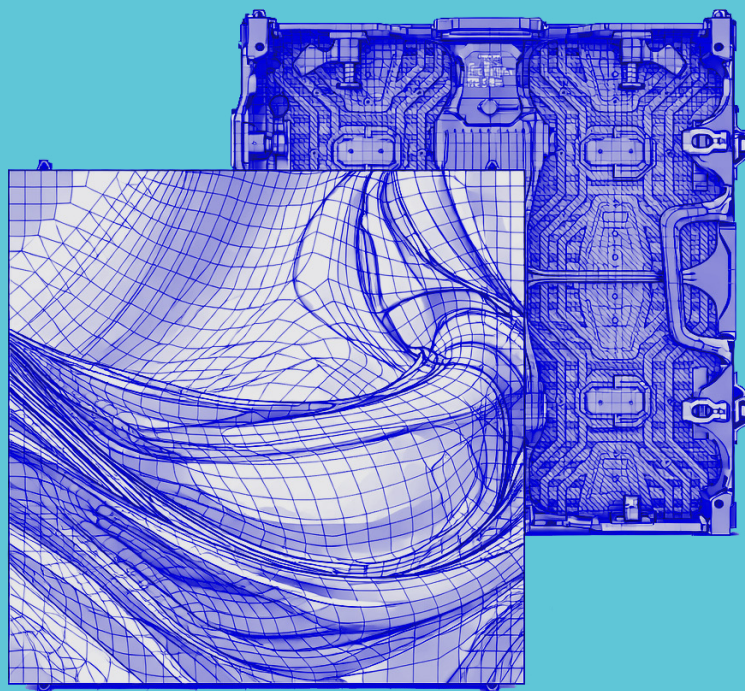

A wide variety of lighting fixtures, either in combination or individually, address these needs: moving heads (laser, profile, beam, spot, wash or hybrid 'BSW', LED multisource), dynamic and static lighting bars and battens, cycloramas, theater (PC, Fresnel and profile), as well as filming lighting panels, architectural outdoor, ambient etc.

LIGHTING

VISUAL

The unique nature of LED display technology – combined with a vast range of innovations and component solutions – enables us to offer an entire universe of diverse products: from competitive and reliable displays to premium components LED screens showing outstanding brightness and performance, which corporate, governmental, or

educational sectors are interested in.

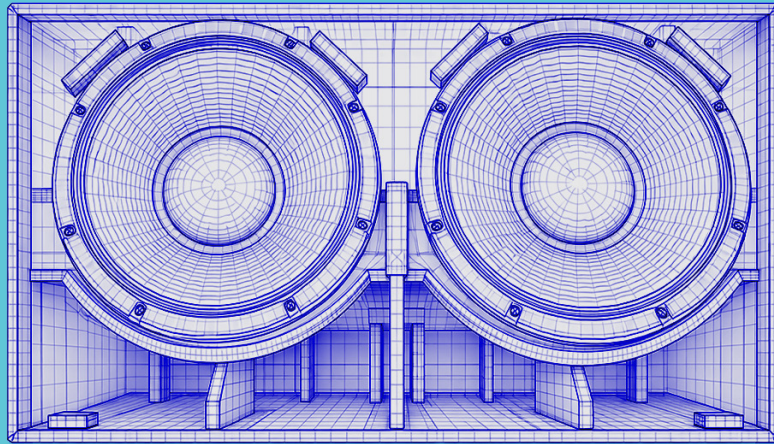

Each of applications can be covered: rental, DOOH, stage and sports, commercial and events, indoor or outdoor, creative shapes and flexible matrixes, control rooms, TV studios or VR, media facades and architectural, transparent both-sides solutions.

VISUAL

AUDIO

Engineered for clear and powerful sound wherever it needs – open airs, large venues, theaters, night clubs: from single units through column sets to line arrays with subwoofers and stage monitors, cinema or conference solutions. Different passive and active speakers tailored for its application – rental and touring or installations.

Given the exceptional complexity of audio solutions for top-tier projects, it is important to emphasize that, in addition to the equipment listed in the catalog, we can offer you products from the world's leading audio brands.

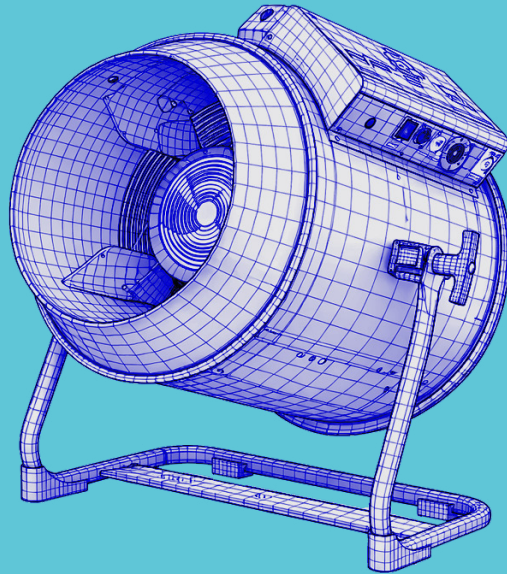

Just [share us](#) your challenge!

RIGGING

TÜV-certified stage electric chain hoists of D8+ (D8 Plus) and C1 safety classes with a lifting capacity of 250 kg, 500 kg, 1000 kg, and 2000 kg, equipped with limit switches and DAT chains.

Multi-channel electric hoist controllers,

range of rigging accessories and manual hoists.

Loading monitoring system with load cells and shackles.

Lightweight kinetic winches for small lighting fixtures and decoration.

stage electric chain hoist

D8+

Key features:

- Robust, lightweight IP66-rated housing for permanent or touring installations
- Lifting speed 4 m/min
- Limit switches (optional, excl. 250 kg)
- Smooth start/stop operation for precise positioning
- Dual braking system for enhanced safety
- Compact design suited for limited rigging space
- Compliant with entertainment rigging safety standards
- Flight-case (optional)

ELECTRIC

HOISTS

RIGGING

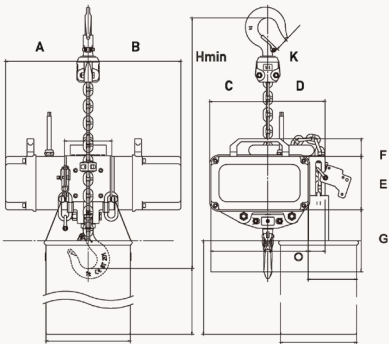

A compact, reliable chain hoist engineered for professional stage, event, and entertainment rigging applications. It delivers smooth, precise lifting control for trussing, lighting, scenery, and other overhead rigging tasks in theatres, studios, and live event productions.

Built to meet stringent entertainment-industry safety standards, it features a rugged aluminum housing, low noise operation, and a compact footprint for easy installation in tight rigging points. Its electric motor provides consistent lift speed and holding power, while an integrated overload protection system and mechanical/ electromagnetic braking ensure safe, dependable performance under continuous professional use.

Ideal for theatres, concert venues, TV/film studios, and touring production companies requiring dependable, code-compliant motorized rigging.

DISCLAIMER

1. Business-to-Business Use Only

The products and services described in this catalog are intended exclusively for business customers, professionals, and legal entities acting in the course of their trade, business, craft, or profession ("B2B Customers").

This catalog is not directed at consumers within the meaning of Directive (EU) 2011/83/EU and applicable national consumer protection laws.

By contacting us, you confirm that you are acting as a business customer or professional user.

2. No Consumer Offer

Nothing in this catalog constitutes an offer or invitation to contract with consumers.

White Cloud Mountain s.r.l. (hereinafter "The company") does not sell products for private or household use and does not provide consumer warranties or guarantees, except where required by mandatory law.

3. Informational Content Disclaimer

All content in this catalog, including text, images, diagrams, videos, and sample product pictures, is provided for general informational and illustrative purposes only and does not constitute technical, engineering, safety, legal, or commercial advice.

4. Product Images and Technical Data

Product images, renderings, and demonstrations are for illustrative purposes only and may differ from the final delivered product.

Technical specifications, certifications, and availability may change without prior notice and do not constitute binding contractual terms unless expressly agreed in writing.

5. Professional Use and Safety Requirements

This professional equipment may pose serious risks if improperly installed or operated.

Installation, operation and maintenance must be performed by qualified and trained personnel only, in accordance with official documentation, applicable EU (and local) directives, harmonized standards and electrical, rigging, and occupational safety regulations.

The company shall not be responsible for any damage resulting from improper installation, misuse, or non-compliance with safety instructions.

6. Special Laser and High-Power Light Hazard Warning

Some products (equipment) may generate high-intensity hazardous optical radiation that can cause serious eye, skin or other personal injury, or fire hazards, or property damage, if improperly installed, configured or operated. Direct exposure to laser beams or high-power light sources must be avoided.

High operating temperatures and concentrated light output may present a fire risk.

Maintain adequate clearance from flammable materials.

The equipment is intended for professional use by exclusively trained personnel only.

Installation, configuration, and operation must comply with applicable safety standards, including IEC/EN 60825, IEC/EN 62471, and local occupational safety regulations.

The company and manufacturer(s) shall not be liable (disclaim all liability) for damages arising from improper installation, misuse, or failure to follow safety instructions, to the maximum extent permitted by applicable law.

7. Warranties

Except as expressly agreed in a written contract with a B2B Customer, the company makes no representations or warranties, express or implied, including any implied warranties of merchantability, fitness for a particular purpose, or non-infringement, to the maximum extent permitted by applicable law.

8. Limitation of Liability

To the fullest extent permitted by applicable law, the company shall not be liable for any indirect, incidental, consequential, or special damages, including but not limited to loss of profits, loss of business, or data loss, arising out of or in connection with the use of this catalog or the products described herein.

Nothing in this disclaimer shall limit or exclude liability for death or personal injury caused by negligence, fraud, or any other liability that cannot be excluded under applicable law.

9. Governing Law and Jurisdiction

This disclaimer shall be governed by and construed in accordance with the laws of the EU Member State in which the company is established, without prejudice to mandatory statutory provisions.
